The approach used is similar to *Baccalaureate Origins of Doctoral Recipients*, 8th Edition, Franklin & Marshall College (accessed on the web at www.fandm.edu/Departments/CollegeRelations/bacorigins/BacOrg98.pdf on 5/19/04). Two cautions: first, the rankings do not take into account the number of graduates who receive medical, law, and other professional, non-doctoral degrees; second, data is not normalized on the basis of institutional size. Persons interested in weighted rankings may refer to other researcher's work (e.g., Alfred E. Hall's article in *Change* in April 1984).
